## Identification of main green infrastructure (GI) elements to be declared at the national scale

### MAIN TOPICS

- Identification of green infrastructure elements at the national level based on the ecosystem services (ES) they provide, their connectivity and biodiversity
- Identification of hotspots of ES potential based on the GI elements
- Delimitation of areas in need of restoration or protection according to their potential to provide ES, connectivity and conserve biodiversity

### Stakeholders

- Public sector ● ● ● ● ●
- Research and education ● ● ● ● ●
- NGOs and civil society ● ○ ○ ○ ○
- Private sector and industry ● ○ ○ ○ ○

### Stages of the cycle to be covered during the project
